BARD & BRAZIER

LUXURY MANUFACTURING

Bard & Brazier's aim to produce the finest Towel Warmers to the highest quality and standards, both aesthetically and technically, has been realised with the extension of our factory in Wolverhampton. This excellence in our products is due to the precision engineering and skill of our artisan Craftsmen who are responsible for manufacturing every rail by hand.

We are set apart from our competitors by manufacturing every individual internal and external component, ensuring our high standard of quality control is met. It allows us to offer a bespoke service, running hand in hand with our standardized ranges so that the Consumer, Designer or Specifier can have exactly what is wanted in the size that suits.

Using only the highest grade silver solder ensures inherently strong jointing. Prior to plating, each rail passes through our own polishing shop where strict controls ensure that all solder is properly polished from the joints and that flat surface areas are perfectly smooth to ensure perfect plating.

We open our factory doors to welcome any of our valued Clients to visit, where the exacting production processes can be watched and better understood. We are proud to claim that our outstanding products are unmatched in quality and are Made In Britain.

OUR CODES & HOW TO USE THEM

For example with:

DRW80/60

DR = Represents the range name, D-Rail

W = Represents the product style, wall mounted

80 = Represents the product height in cm

60 = Represents the product width in cm

...and with:

LFF95/60

LF = Represents the range name, La Fayette

F = Represents the product style, floor mounted

95 = Represents the product height in cm

60 = Represents the product width in cm

(Hepburn is the exception HBN105/60 - 105 represents width and 60 represents depth. This is to indicate the space requirement.)

PLEASE NOTE

All our rails can be made to your own specific sizes and designs can be amended to your requirements
